NICOLAS VILLANOVA

Full-stack Web Developer
linkedin.com/in/nicolavnp | nicolasgabrip@gmail.com | github.com/zerkeizi

SUMMARY

Full-stack JavaScript developer with 7 years building web products. Currently working in a SERN stack, but also familiar with frameworks such as NestJS. Proven experience with microservices architecture using RabbitMQ for communication. Attention to performance, UX, and SEO. Also comfortable in PHP with Laravel, WordPress and Drupal when the project calls for it. Personal experience with AI coding agents (Claude Code), exploring subagents and skills.

PROFESSIONAL EXPERIENCE

TRIZY | Full-stack Developer May 2022 - Jan 2026

- Developed new features and enhancements using ReactJS, NodeJS, improving usability.
- Optimized and stabilized legacy apps built in Oracle PL/SQL stored procedures and AngularJS.
- Developed apps using NestJS and RabbitMQ, establishing communication between microservices.
- Worked within a MFE architecture across independent repositories.
- Constant use of kubectl or kubenav to port-forward into different microservices' slots, enabling direct local access to their databases for debugging and troubleshooting.
- Contributed to code quality through git-based workflows and code reviews.

MEEG LAB | Full-stack Developer Feb 2021 - May 2022

- Developed websites using Drupal and Laravel improving CMS workflow and platform flexibility.
- Built decoupled NuxtJS + Laravel APIs, cutting future development time by ~50%.
- Configured Linux VPS with Nginx reverse proxy and PM2 for node app deployments.
- Implemented API integrations to extend product capabilities and meet business requirements.

TRINTO | Front-end Developer Oct 2020 - Jan 2021

- Developed modules for HubSpot websites using Vue, SCSS and Gulp, enhancing website building.
- Developed responsive hotsites for marketing campaigns using pure HTML and CSS.

MAIS SHOWS | Full-stack Developer Jun 2019 - Sep 2020

- Developed web pages with HTML, CSS and JS (JQuery), supporting usability improvements
- Contributed to projects using ReactJS and React Native, expanding product's capabilities across devices
- Developed in a PHP (Laravel) in a MVC architecture platform, improving and adding new features.
- Enhanced payment gateway (Pagar.me) integration – adding multi-currency support for international transactions.
